TREE/WOODLAND APPRAISAL AND COMPARISON TO EXISTING SURVEY OF 2020 BOATBRAE WOOD, THORNHILL

David Neill was commissioned to undertake an onsite appraisal and comparison to a pre-existing survey of Boatbrae Wood, Thornhill. 2020.

GENERAL

At the time of visit weather conditions were dry and clear. Ground conditions underfoot were favourable.

Onsite appraisal was carried out to the standards of BS5837:2012. The existing survey was available for comparison.

Individual trees, numbered 613 – 640 were inspected using VTA, Visual Tree Assessment. The greater woodland was walked and inspected in more general terms, as per original survey.

INDIVIDUAL TREES 613 – 640

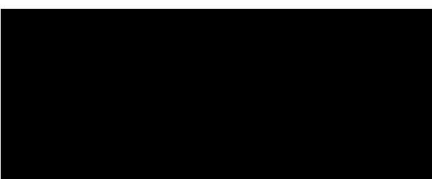

Individual trees were located with relative ease. Tagging was relatively consistent. 2023 Onsite appraisal broadly mirrors the findings of the 2020 survey.

GREATER WOODLAND

2023 appraisal broadly mirrors the findings of 2020 survey.

CONCLUSION

There is no material change of significance to the findings and recommendations of the 2020 tree Survey at Boatbrae Wood, Thornhill. The survey may be adopted in entirety as relevant at this time, February 2023.
